## POWERHEAT

**POWERHEAT is the new style (engine) pre-heater. The compact design, in combination with the chosen materials, integrated pump, adjustable thermostat and all required control and safety features, makes it an exceptional high quality heater.**

**The heat exchanger is based on a die-cast tubular component in aluminum with a large heating surface. The heating element is embedded in aluminum during the die-casting process so therefore completely corrosion proof and not in direct contact with the coolant or liquids.**

**This means a more effective heating and no negative side effects for the coolant or liquids. In addition the Aluminum AS13 is finished with a Teflon coating.**
